

COOKIE POLICY

Browser storage, not snacks. The seal remains disappointed.

Last updated: October 16, 2026 | cdsu.xyz

This page describes browser storage and similar technologies used with the Site. No actual cookies were issued to the seal during preparation of this document.

01 What Is a Cookie?

A tiny file in your browser. Not chocolate chip. Please stop asking the seal.

cdsu.xyz may use cookies, local storage, session storage and similar browser technologies to remember basic state, keep sessions working, reduce abuse and support optional features.

02 What May Go in Your Browser Cupboard

Privacy choices

Whether you accepted or rejected non-essential categories, if such a control is used.

Security and anti-abuse

Session identifiers, rate limits, fraud prevention or anti-bot state.

Frost intro

Whether you have already wiped enough frost off the window for one lifetime.

Normal or flipped view

Which side of the mirror you selected.

Nickname and interface settings

Optional preferences that make repeat visits less repetitive.

Analytics and performance

Self-hosted Umami provides aggregate usage statistics. Any use of browser storage for analytics is subject to consent where required.

03 Necessary Storage

Some browser storage may be needed for security, session continuity, anti-abuse controls or saving privacy choices. Blocking all storage can make parts of the Site forget who, where and occasionally which side of the mirror they are.

04 Analytics

The Site uses self-hosted Umami for aggregate statistics about visits and feature usage. If analytics or performance tools use non-essential browser storage, they should wait for consent where required. Aggregate analytics and a browser cookie are not the same thing.

05 Messages, Game Results and Emails Are Not Cookies

Message-flipper text is intended to be processed locally and not stored merely because you typed it. Chat messages and submitted game results may be stored as application data because you intentionally submitted them. A session cookie or local identifier may help connect the browser to those features, but the message itself is not a cookie. It would be a terrible cookie.

An optional X handle submitted with a score is public leaderboard data. An email left for collectible availability is used to notify you when figures become available and is not displayed publicly. These submissions are application data, not cookies.

06 Third-Party Doors

Links to X, wallets, explorers, launch platforms or trading venues may take you to services that use their own cookies or tracking technologies. Their policies apply once you leave the Site. Embedded third-party content, if added later, should follow any consent requirements that apply.

07 How to Empty the Cupboard

- use any Cookie Settings control provided on cdsu.xyz;
- block or delete cookies through your browser settings;
- clear local storage or Site Data through your browser; and
- remember that deleting everything may also delete saved preferences or session state.

08 Keep This Page Honest

This Policy should describe the actual production Site. If deployed cookie names, local-storage keys, analytics tools, retention periods or consent controls change, the page should be updated instead of pretending the old setup is still correct. Even a seal should face reality occasionally.

NO MAGIC LEGAL FORCE

This page is part of a meme project and is written in plain language for information and house-rule purposes. It is not legal advice, a legal opinion, a prospectus, or a magic shield. The project does not claim that a sentence on this page can erase rights, duties, or rules that apply under mandatory law or third-party terms.
